PROFESSIONAL SUMMARY

Technical marketing and growth systems professional who identifies business bottlenecks and builds the software, marketing, analytics, CRM and automation systems that address them. Combines full-stack development with SEO, HubSpot, lead workflows and AI-assisted implementation, backed by roughly 20 years in trades, construction, automotive, fleet and service-business environments.

SELECTED IMPACT

BELLHOUSE EXCAVATING

40 → 100+

Organic Google Search clicks per rolling 28 days. 2.5x+ growth.

+76% YoY

Google Business Profile website clicks through local SEO, service-page strategy and website improvements.

NEXT CONSTRAINT IDENTIFIED

Used attribution, lead and call data to identify that the next growth constraint had shifted from traffic generation to **lead handling, CRM structure, notifications, reminders and follow-up.**

EXPERIENCE

VP of Marketing	Jul 2025 - Present
TL Execs · Boutique executive search & direct-hire recruiting	Part-time · Remote

- Lead marketing and website strategy, including the redesign and modernization of the firm's website and digital presence.
- Develop SEO, site architecture and content strategy around recruiting services and target markets.
- Build lead-generation tools, landing pages, forms and conversion pathways; support CRM, analytics and lead tracking.
- Work with leadership on positioning, messaging, audiences and offers, and handle the technical implementation.

Technical Marketing & Growth Systems	Aug 2025 - Present
ALL8 Webworks · Founder / Self-employed	Remote

- Build digital systems that help service businesses get found, capture opportunities and follow up more effectively.
- Build production web applications on Next.js, React, TypeScript and Node.js, with technical SEO, structured data and analytics.
- Build lead-capture, CRM and automation workflows integrating forms, HubSpot, email, APIs and other business systems.
- Manage production deployment, hosting, security and monitoring; use AI-assisted development with human review.

Web, Estimating & Digital Systems Specialist

Bellhouse Excavating

Feb 2023 - Present
Paris / Brant County, ON

- Built and maintain the production website and acquisition foundation for an active excavation contractor, with service and location content developed around customer search intent.
- Manage technical SEO, Google Business Profile, GA4, Search Console and conversion measurement.
- Built secure lead-intake workflows with server-side validation, email delivery, reCAPTCHA and Google Sheets API, backed by Playwright automated testing and production monitoring.
- Analyzed call and lead performance, identified lead handling and follow-up as the next constraint, and expanded systems toward CRM, notifications, reminders, call tracking and follow-up.
- Support estimating, proposals, tender work, job planning and operational workflows, applying real field knowledge so systems fit how the business runs.

Website & SEO Specialist

Assure Alert / Independent Life Systems

Sep 2024 - Aug 2025
Remote

- Improved a WordPress website through technical SEO, content structure, landing pages, lead capture and performance optimization.
- Configured analytics and SEO tools and translated stakeholder requirements into practical web improvements.
